

Rapid Credit Program

Improve Cash Flow for 2024 DIR Changes

The Center for Medicaid and Medicare Services (CMS) issued a final rule that **eliminates PBMs' retroactive application of direct and indirect remuneration (DIR) fees, beginning in 2024**, requiring that they be reflected in the negotiated price the patient pays at the pharmacy counter.

Our Rapid Credit Program is an excellent way to help pharmacies boost cash flow quickly so that money can be injected back into your pharmacy as needed in the face of mounting industry challenges and financial pressures with the **2024 DIR changes**.

Our Rapid Credit Program provides liquidity in 14 days, decreasing credit collection time by 96%.

Improve cash flow quickly: Credits are issued within 14 days from the date of processing at Pharma Logistics' Fulfillment center—instead of waiting 12 or more months, the industry standard.

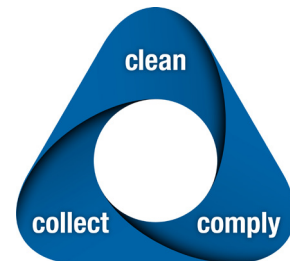

Eliminate reconciliation time: Upfront payments eliminate time spent on reconciliation and reduce the labor burden on staff. Accurate, predictive calculations of Expected Return Value (ERV) mean higher prefunded payments.

Reduce of risk: Transfer risk of manufacturer policy change from pharmacy to Pharma Logistics.

Rapid Credit Program Benefits

- Receive credit within 14 days
- Boost cash flow and generate recurring revenue
- Eliminate reconciliation time with upfront payment
- Transfer risk of denied manufacturer credit from your pharmacy to Pharma Logistics
- Use our Rapid Credit Program with both our Onsite and Box and Ship services

Getting started with our Rapid Credit Program is easy. Call 888-729-7427 or visit www.pharmalogistics.com and we will take it from there!
